

Kevin Lindholm

Software Developer

Previously I worked in Human Resources specializing in organizational management, helping others improvise, adapt, and overcome seemingly insurmountable challenges, which was both challenging and rewarding. I aim to accomplish the same thing with my work in software development.

WORK EXPERIENCE

Software Engineer at 100devs, Remote Jan 2022 — Present

- Collaborated with teams of developers to design and build responsive full-stack web applications using best practices
- Researched innovative techniques to write efficient code to improve various web projects while meeting tight deadlines.
- Used GitHub and CI/CD to keep team communication and workflow in sync
- Applied agile methodologies like SCRUM for project management
- Built 50+ semantically structured and responsive full-stack web applications for mobile and desktop devices

Recent Projects:

Let's do Korean (한국어 합시다) – Users can use a wide variety of interactive and entertaining quizzes and reading materials in order to improve their Korean Language proficiency (currently in development).

Mixers (Fullstack Web App) – Mixers Web App allows users to quickly and easily search a database containing all popular drinks and recipes. Selected drinks are then displayed with pictures and step-by-step instructions for creating the drink in question.

Other Projects: Fast-Hands dealers card game, StarGazers Collective Web App with NASA API integration, Pomodoro timer that enables users to apply the study method referred to as "Pomodoro Method" for focused study.
